

Morrisville Resurface Project

Date: 2022

Location: Morrisville, NC

Advantage: Cost Savings

Technical Specifications

Fiber Reinforcement: FORTA-FI[®] 3/4"

Application: Mill & Fill

Dosage: 1 lb/ton

Overlay Thickness: 3"

Additives: 30% RAP

Delivery Method: Voyager

The City of Morrisville resurfaced its city streets with **FORTA-FI** reinforced asphalt. By choosing the 3" FRAC mill & fill instead of a 4" non-FRAC intermediate surface, this \$1.1 million project saved \$63,000. The decision to use **FORTA-FI** in this project came from the data of independent studies and will be a great example of **Stronger Lasting™** pavement for years to come.
