## Technical Specifications

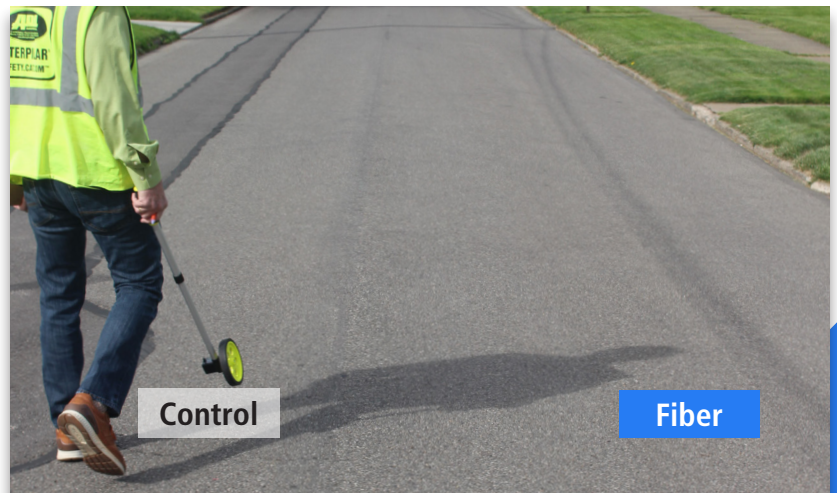

**Fiber:** FORTA-FI<sup>®</sup>

**Total Project Size:** 116 Tons

**Application:** Thin Overlay

**Overlay Thickness:** 1"

**Additives:** RAP (Recycled Asphalt Pavement)

Grove City, PA completed a side-by-side trial project (control vs. fiber) on Spring Street. The entire road was first milled and then filled. Half of the street had **FORTA-FI** in the wearing course and the other side was used as a control.

### UPDATE

**After inspection at year 3**, Spring Street continues to show **minimal signs of pavement distress** and boasts an average of **95 PCI** (Pavement Condition Index) while the control side has an average PCI of 88.
