FORTA®
REINFORCEMENT THAT LASTS™

DOT
Resurface

State Route 63
5-year update

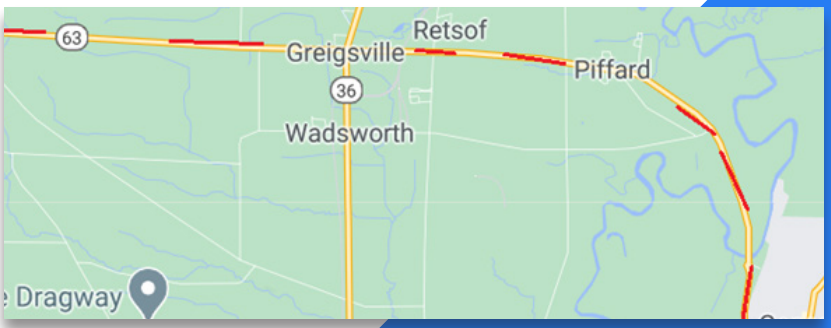
Date: 2016

Location:
Rochester, NY

Advantage:
Cost Effective

Technical Specifications

Fiber: FORTA-FI®
Existing Pavement: Composite Roadway
Application: Mill & Fill
Overlay Thickness: 2" HMA
Traffic Volume: 20% Heavy Truck Load



11 miles of State Route 63 in NY DOT Division 4 was in need of resurfacing. Standard repairs of a concrete pavement would have included deep joint repairs and cost the taxpayers over $600,000. District 4 decided to add **FORTA-FI reinforcement fibers** to the 2" composite overlay.

UPDATE

After 5 years of heavy volume traffic this project has been inspected and remains in **excellent condition**.
