

FI-GREEN™

FIBER REINFORCED ASPHALT

BUILD GREENER, BUILD STRONGER

FORTA-FI®—NOW W/RECYCLED PLASTIC!

FI-GREEN™ delivers the recycled plastic solution, providing enhanced asphalt durability, eco-friendly performance, and long-lasting results for more sustainable paving.

PREDICTABLE SOURCING

FI-GREEN provides a predictable source of post industrial low-density PE to safely incorporate into our fiber blend. Predictability is key to sustainable performance.

SAFE, CLEAN, & FREE FROM MICROPLASTICS

Clean, safe, and non-toxic, our recycled PE seamlessly melts into the asphalt binder—ensuring superior performance without microplastic leaching.

WHERE SUSTAINABILITY MEETS PERFORMANCE

Get the same proven performance of FORTA-FI®—now with a sustainable edge! Packed with 19 million high-tensile strength fibers per ton of asphalt, it's the strength you trust with the environmental benefits you need.

At FORTA®, we innovate and step outside of the box. Utilizing our proven pavement reinforcement technologies and solutions, our strategies extend pavement life, reduce maintenance, and save money. FORTA's team of licensed pavement engineers and experienced field professionals have seen it all and are here to help.
