

State Route 15

Date: 2023

Location: Palm Beach County, FL

Advantage: Pavement Life

Technical Specifications

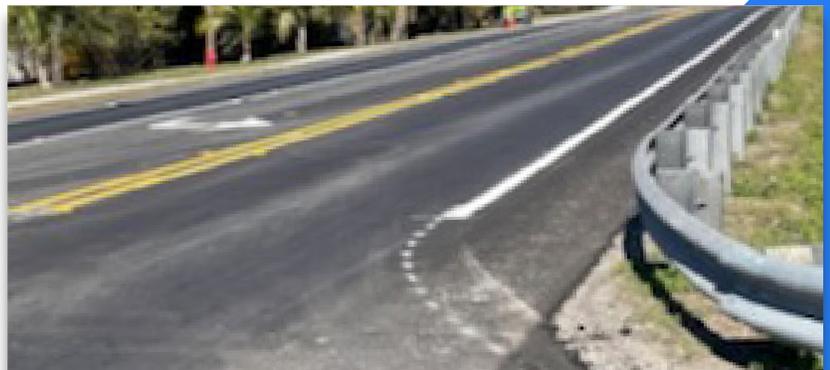

Fiber Reinforcement: FORTA-FI[®]

Application: Mill & Fill

Total Project Size: 2,100 tons

Overlay Thickness: 2-3 ½" Structural Layer,
1 ½" Friction Layer

Delivery Method: Voyager

This control vs. fiber project for the Florida Department of Transportation (FDOT) placed fibers in both the base and wearing courses. On-site personnel were very pleased with **FORTA Voyager's** performance at the plant and did not experience mixing or dispersing issues at the job site. Over the next few years, FDOT will evaluate the project to analyze the **extended pavement life** cycle provided by **FORTA-FI** reinforcement fibers.
