

APA Parking Garage

Date: 2023

Location: Allentown, PA

Advantage: Safer Work Environment, Reduced Construction Time, Improved Wear Resistance

Bazella Group
Whitehall, PA
www.bazellagroup.com

Technical Specifications

Fiber Reinforcement: FORTA-FERRO[®] 2-¼"

Application: Slab-on-Ground (Interior),
Overlay (Exterior)

Replaced: Specified Steel

Dosage: Varying

Delivery Method: Pumped, Tailgated

Finishing Method: Broomed

FORTA-FERRO macro synthetic fibers were used in **multiple applications** in this new parking garage. The use of fiber reinforcement instead of traditional steel reinforcements allowed for a **faster project timeline**. Using FORTA-FERRO also **improves the wear resistance** of this project while creating a **safer work environment**.
