

Kennedy Highlands Apartments

Date: 2022

Location: McKees Rocks, PA

Advantage: Cost Savings

Technical Specifications

Fiber Reinforcement: FORTA-FERRO[®] 2¼"

Application: Slab-on-Ground

Doasge: 3.0 lb/cu yd

Total Project Size: 330 yd

Replaced: Specified 6x6 Wire Mesh

Delivery Method: Tailgated, Georgia Buggy

Finishing Method: Hard-Steel Troweled

This newly constructed multi-story apartment building **replaced traditional steel reinforcements** with **FORTA-FERRO** macro synthetic fibers. This allowed the contractor to **lower the price** for the total project. Even though the concrete was poured during January in a traditionally cold northeastern climate, contractors note that the **project finished very nicely**.
