FORTA®
REINFORCEMENT THAT LASTS™

Commercial
New Construction

Patton Warehouse

Date: 2023

Location: Milton, PA

Advantage: Reduced Construction Time, Increased Fatigue Resistance

Technical Specifications

Application: Slab-on-Ground (Interior)
Fiber Reinforcement: FORTA-FERRO® 2¼"
Fibers Specified: Replaced W4 6x6 Steel
Delivery Method: Tailgated
Finishing Method: Steel-Troweled

Having used **FORTA-FERRO** in several other buildings, owners chose to **replace specified steel** reinforcement in this newly constructed building. This allowed contractors to **speed up pouring** of the concrete and created a **safer job site**. This macro synthetic fiber also establishes a **better wearing surface** over the life of the concrete.
