Technical Specifications

Fiber Reinforcement: FORTA-FERRO[®] 2-¼"

Application: Slab-on-Ground, Pavement

Doasge: 5.0 lb/cu yd

Total Project Size: 10,000 yd

Delivery Method: Tailgated

Finishing Method: Broomed, Steel-Troweled

This newly constructed commercial facility used **FORTA-FERRO** macro synthetic fibers to reinforce the interior floor as well as the truck apron and parking areas. The use of FORTA-FERRO **in lieu of traditional steel reinforcements** allowed the project to **stay on schedule** in spite of last minute contractor changes.
