

Falcon Road

Date: 2021

Location: Madras, OR

Advantage: Increased Life,
Reduced Cracking,
Ravelling & Rutting

FORTA*fi*ed[®]

Technical Specifications

Application: Mill & Fill

Fiber Reinforcement: FORTA-FI[®]

Mix: Dense Grade HMA

Fiber Layer: Wearing Course

Thickness: 2"

% of RAP: 20%

This low-volume roadway used **FORTA-FI** to extend the asphalt's life and delay reconstruction. The innovative fibers **reduced cracking, raveling, and rutting**, resulting in a pavement that **remains crack-free** nearly four years later. This demonstrates FORTA-FI's effectiveness in **enhancing durability** and **reducing maintenance needs**.
